Data Analytics Internship

ABSTRACT

This project focuses on analyzing customer demographic data using Power BI. The dashboard provides insights into customer distribution based on gender, age, annual income, and spending behavior. These insights help businesses understand customer characteristics and support data-driven decision-making.

OBJECTIVES

1. Analyze customer demographic information.
2. Study gender distribution.
3. Examine annual income levels.
4. Evaluate customer spending behavior.
5. Generate business insights using visualizations.

TOOLS USED

- Microsoft Excel
- Power BI Desktop
- GitHub
- Microsoft Word
- Microsoft PowerPoint

DATASET DESCRIPTION

The dataset contains customer information including:

- Customer ID
- Gender
- Age

- Annual Income (k\$)
- Spending Score

DASHBOARD ANALYSIS

The dashboard includes:

- Total Customer Count
- Gender Distribution
- Annual Income by Gender
- Income vs Spending Score Analysis
- Customer Demographic Insights

The visualizations help identify customer patterns and behavioral trends.

KEY FINDINGS

- Female customers represent a slightly larger share of the dataset.
- Annual income varies significantly across customer groups.
- Spending behavior differs among customers.
- Customer segmentation can improve marketing strategies.

CONCLUSION

The Customer Demographics Study demonstrates the effectiveness of Power BI in transforming customer data into meaningful visual insights. The dashboard provides valuable information that can support marketing, customer engagement, and business decision-making.
